

Bosch: Brake Pads Factsheet

All required accessories in one box

To speed up repairs, Bosch has improved the contents of its brake pad boxes: Adding to its comprehensive range of brake pads, the boxes for a large number of new part numbers now also include the required accessories for quick and easy maintenance.

Fast, hassle-free maintenance

Less annoying noise

Prevent brake judder

Available accessories now in the box (example: [0 986 494 823](#))

Screws

To prevent uneven wear, screws with integrated locks securely hold the caliper in place.

Sliders

Sliders ensure that the pads move more smoothly in both directions. They also keep them in alignment, which reduces noise and prevents brake judder.

Springs

Some pads require springs, which are included in Bosch's range of accessories.

Replace sliders and worn screws to prevent brake noise and judder.
